# SPRINT 1

SETTING UP THE APPLICATION ENVIRONMENT

Installing IBM Cloud CLI :

Once you have created an IBM cloud account, you can view some tutorials in the dashboard. In the tutorial, we will install the IBM cloud CLI using the documentation we received during the installation process.

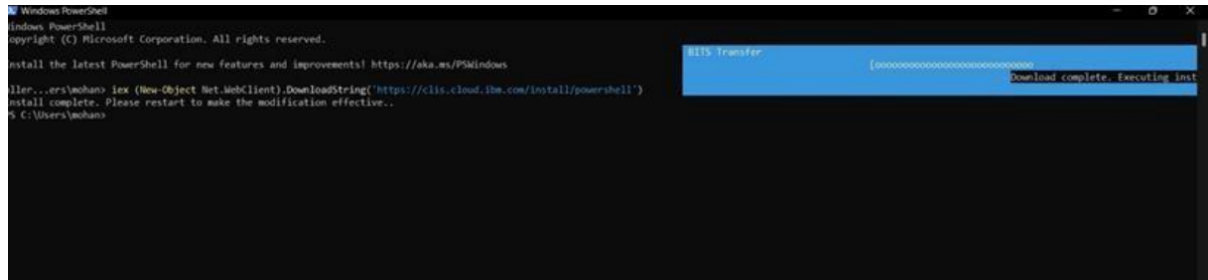

As soon as you click that tutorial, a document will open containing instructions for installing IBM cloud CLI as well as some plugin-tools for work purposes while developing and deploying the application.

- Use the following Command to Install the IBM Cloud CLI:

iex (New- ObjectNet.WebClient). DownloadString('https://clis.cloud.ibm.com/install/powershell')

- Using IBM cloud CLI, here is the PowerShell screenshot:
